Sew window wipers. Bevel and slick edges of windows, lights and logo.

Bevel the V edge and slick it. With a bit of glue attach lights and sew them

Glue and sew windows and logo

Glue the front parts, use needles to position stitching holes. Stitch the V

Glue front bumper and stitch it as on photo

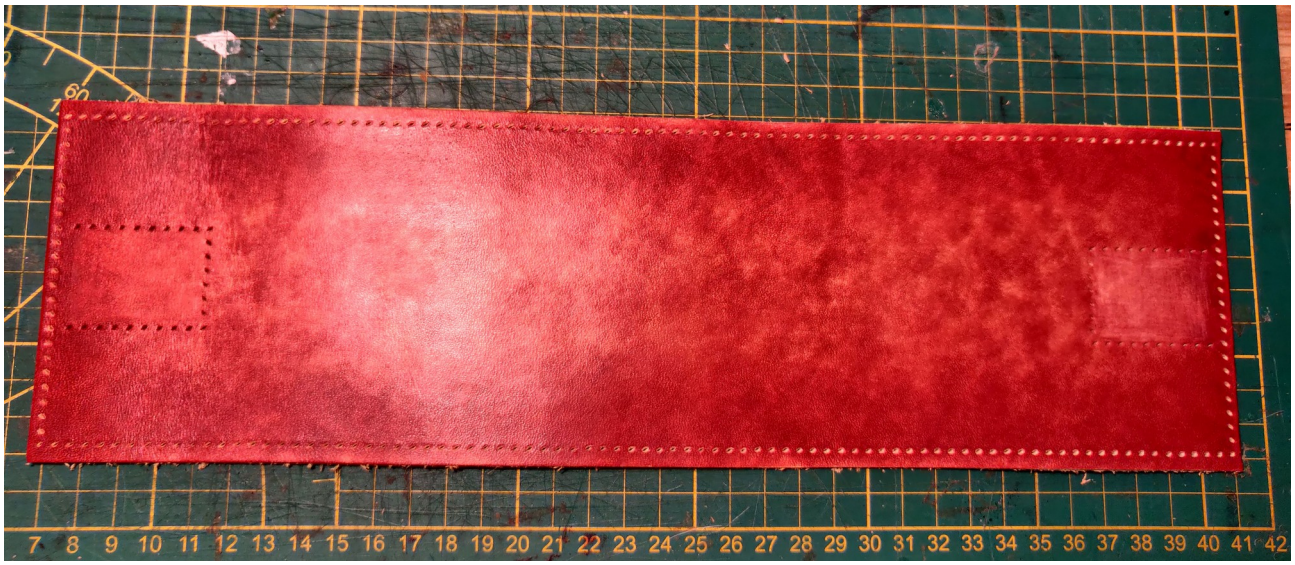

Glue and stitch back parts

Attach zipper

Bevel and slick short edges

Glue and stitch one side. Remember to hammer down these stitches.

Glue and stitch strap mount. D-ring is 27mm wide (inner) and 5mm thick. Repeat on the second side

Bevel and slick all edges of front and back piece.
If you want to add plate with name, now is the right time to punch stitching holes for it. Stitch it when bag is finished.

Make sure that zipper opens in right direction. Position back and side as shown on photo and stitch it. Start with three back stitches.

I prefer to stitch first lower section, terminate with three back stitches and then stitch upper section also with three back stitches. It can be a bit harder to stitch on the arcs, you can rub then a few drops of water to the flesh side of leather, it will make it more pliable Repeat these steps on the front part.

The last step is to make a strap. But you will figure it out on your own, I’m sure:)
