Shark

BACKPACK & CROSSBODY BAG

Shark is a unique bag with strong characters.

- The pattern can be printed on different scales to get the size as you desire, so that you can make a family of shark bags for both grown-ups and children!

  For your reference, the approx. length measured from head to tail:

  Large size /mummy shark (printed on 100% scale) - 45cm (17 ¾")

  Small size /baby shark (printed on 55% scale) - 24cm (9 ½")

- 1cm seam allowance is included in our patterns.

  Note: when using patterns printed on scales other than 100%, the seam allowance will be 1cm x scale. For instance, when pattern is printed on 70% scale, the seam allowance should be 0.7cm.

SUPPLIES

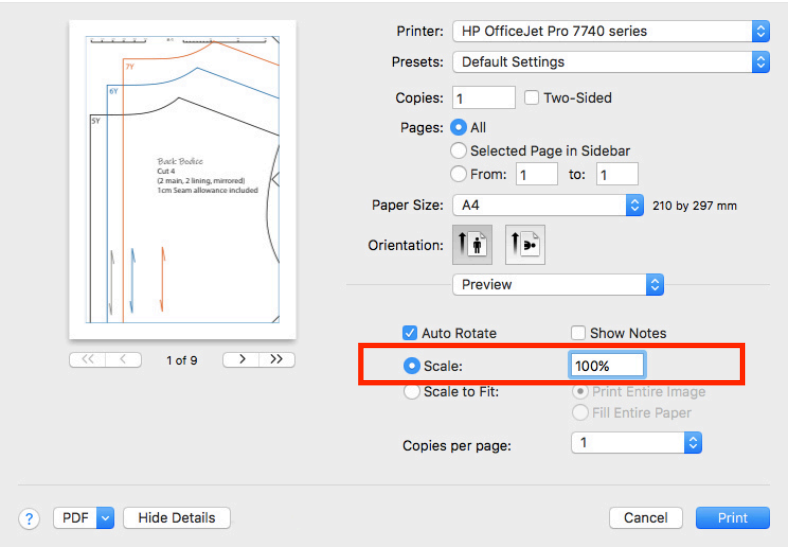

- Main Fabric - medium to heavy weight woven fabrics, such as denim, canvas; or light weight fabrics with additional interfacing/lining fabric
- Lining Fabric - any standard light weight fabric
- Interfacing fabric of your choice and a small quantity of hollow fibre polyester filling (often used for pillow or toy)
- 2 (for baby shark) or 4 (for mummy shark) lobster clasps
- 2 buttons for eyes (optional)

Pattern Printing & Assembly

PRINT

Print the pattern on standard **A4** paper:

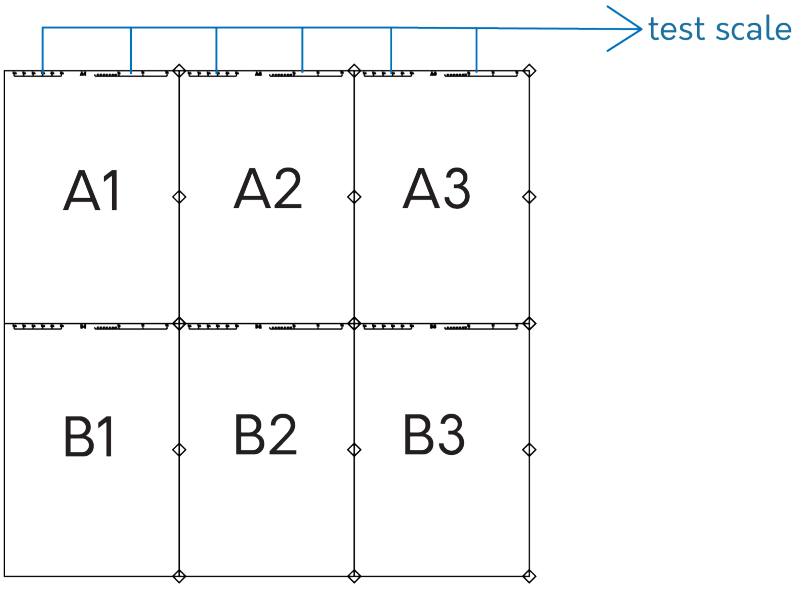

1. Open the PDF pattern file
2. Select "**File**" from top menu, and "**Print...**" from the drop-down menu
3. Make sure the "**Scale**" is set to **100%** or other scale for the size you want
4. For Windows, open the "Advanced Print Setup" window by clicking the "**Advanced**" button and make sure the box in front of "**Print As Image**" is checked
5. Click **Print**

PATTERN ASSEMBLY

Assemble the pattern pieces according to the name on top of each paper (e.g. A1, A2, A3...B1, B2 B3...). A1 is the first piece on the first row, and B3 is the third piece on the second row.

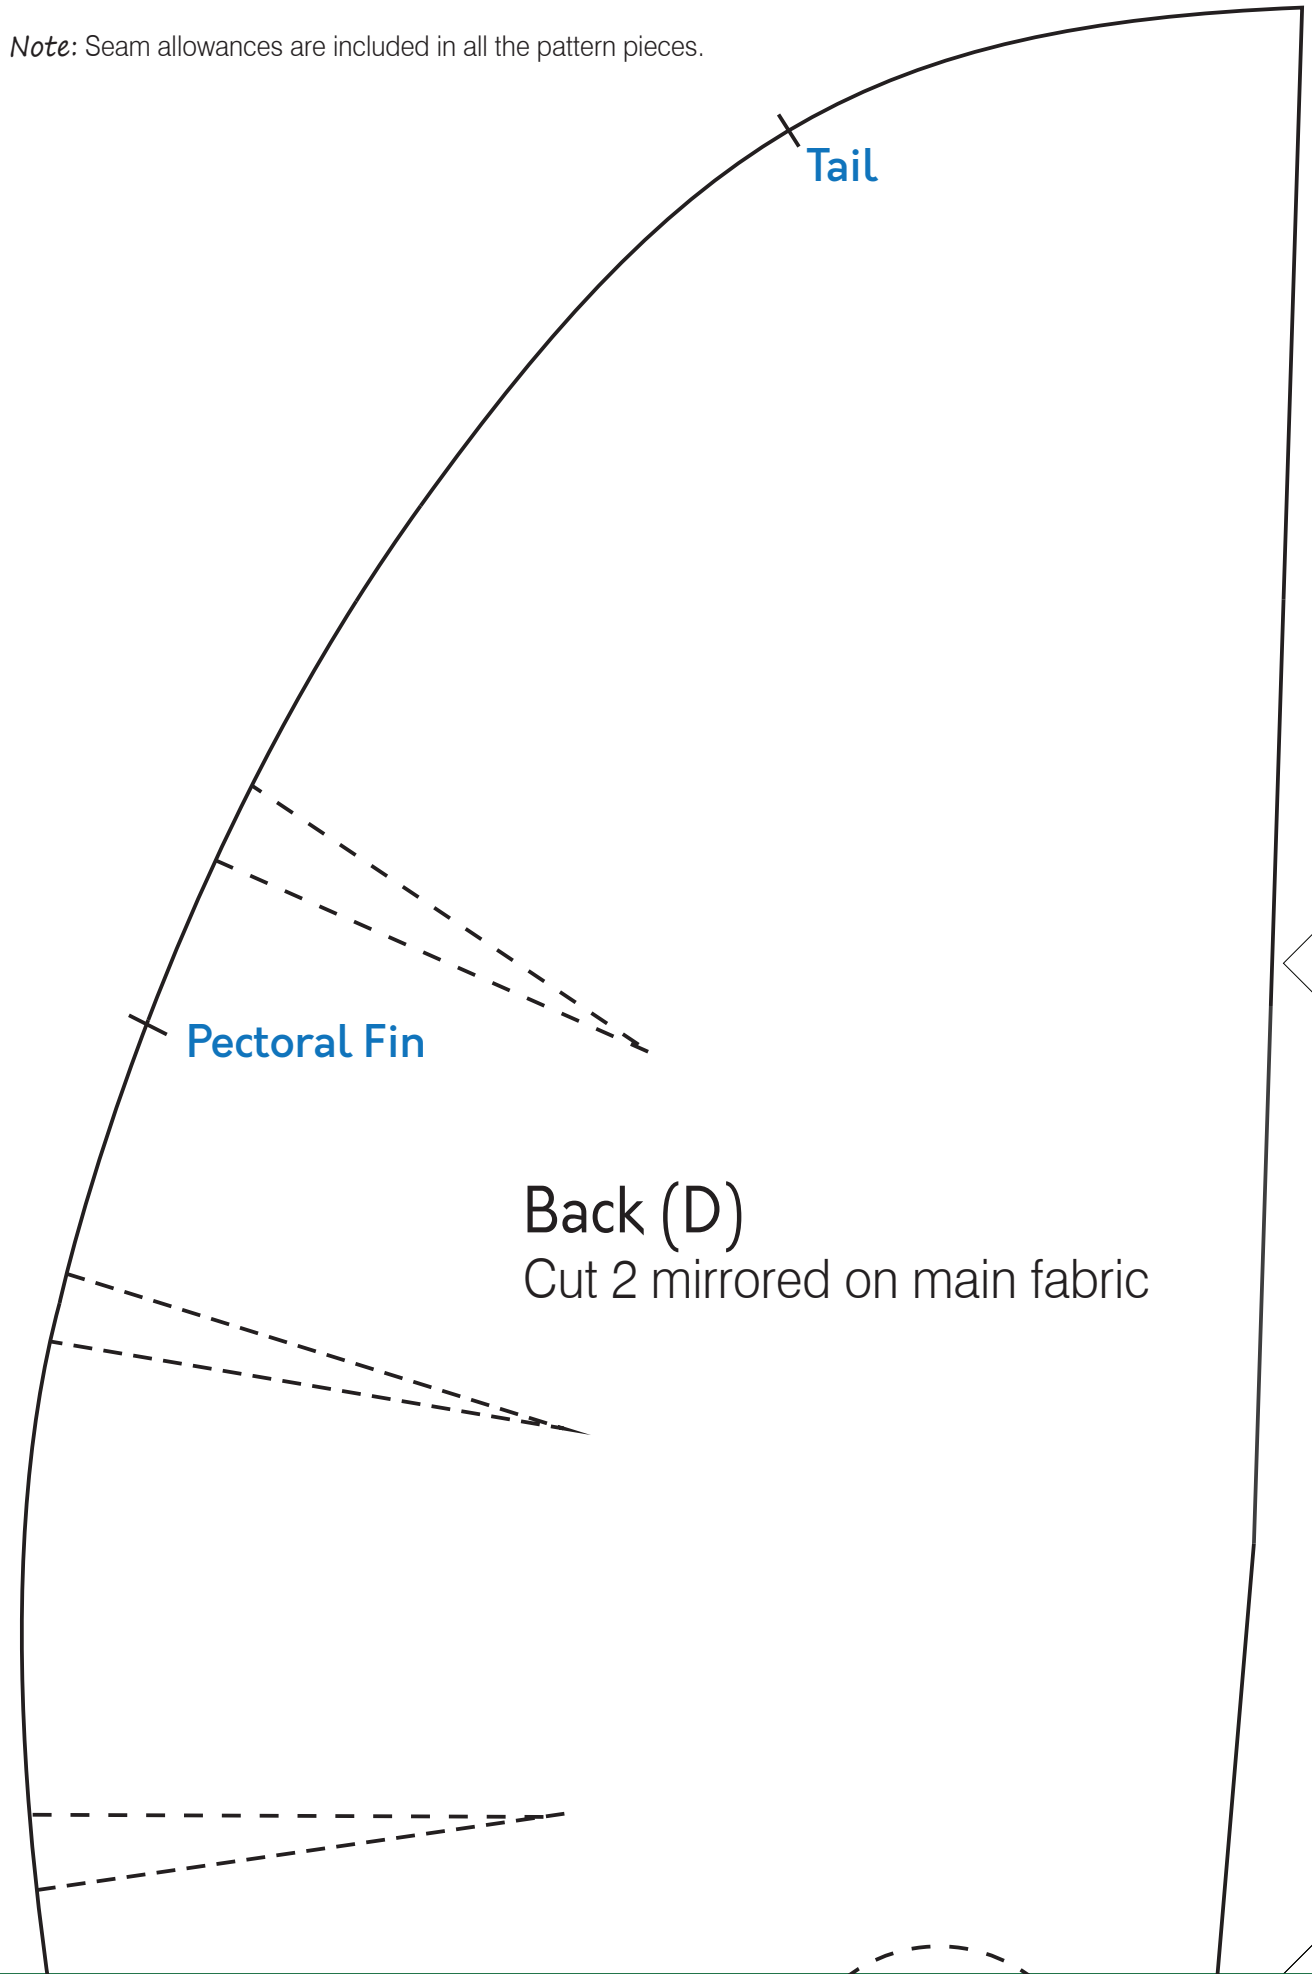

Each paper has test scales printed on the top. Use them to make sure that the pattern has been printed on the right scale.

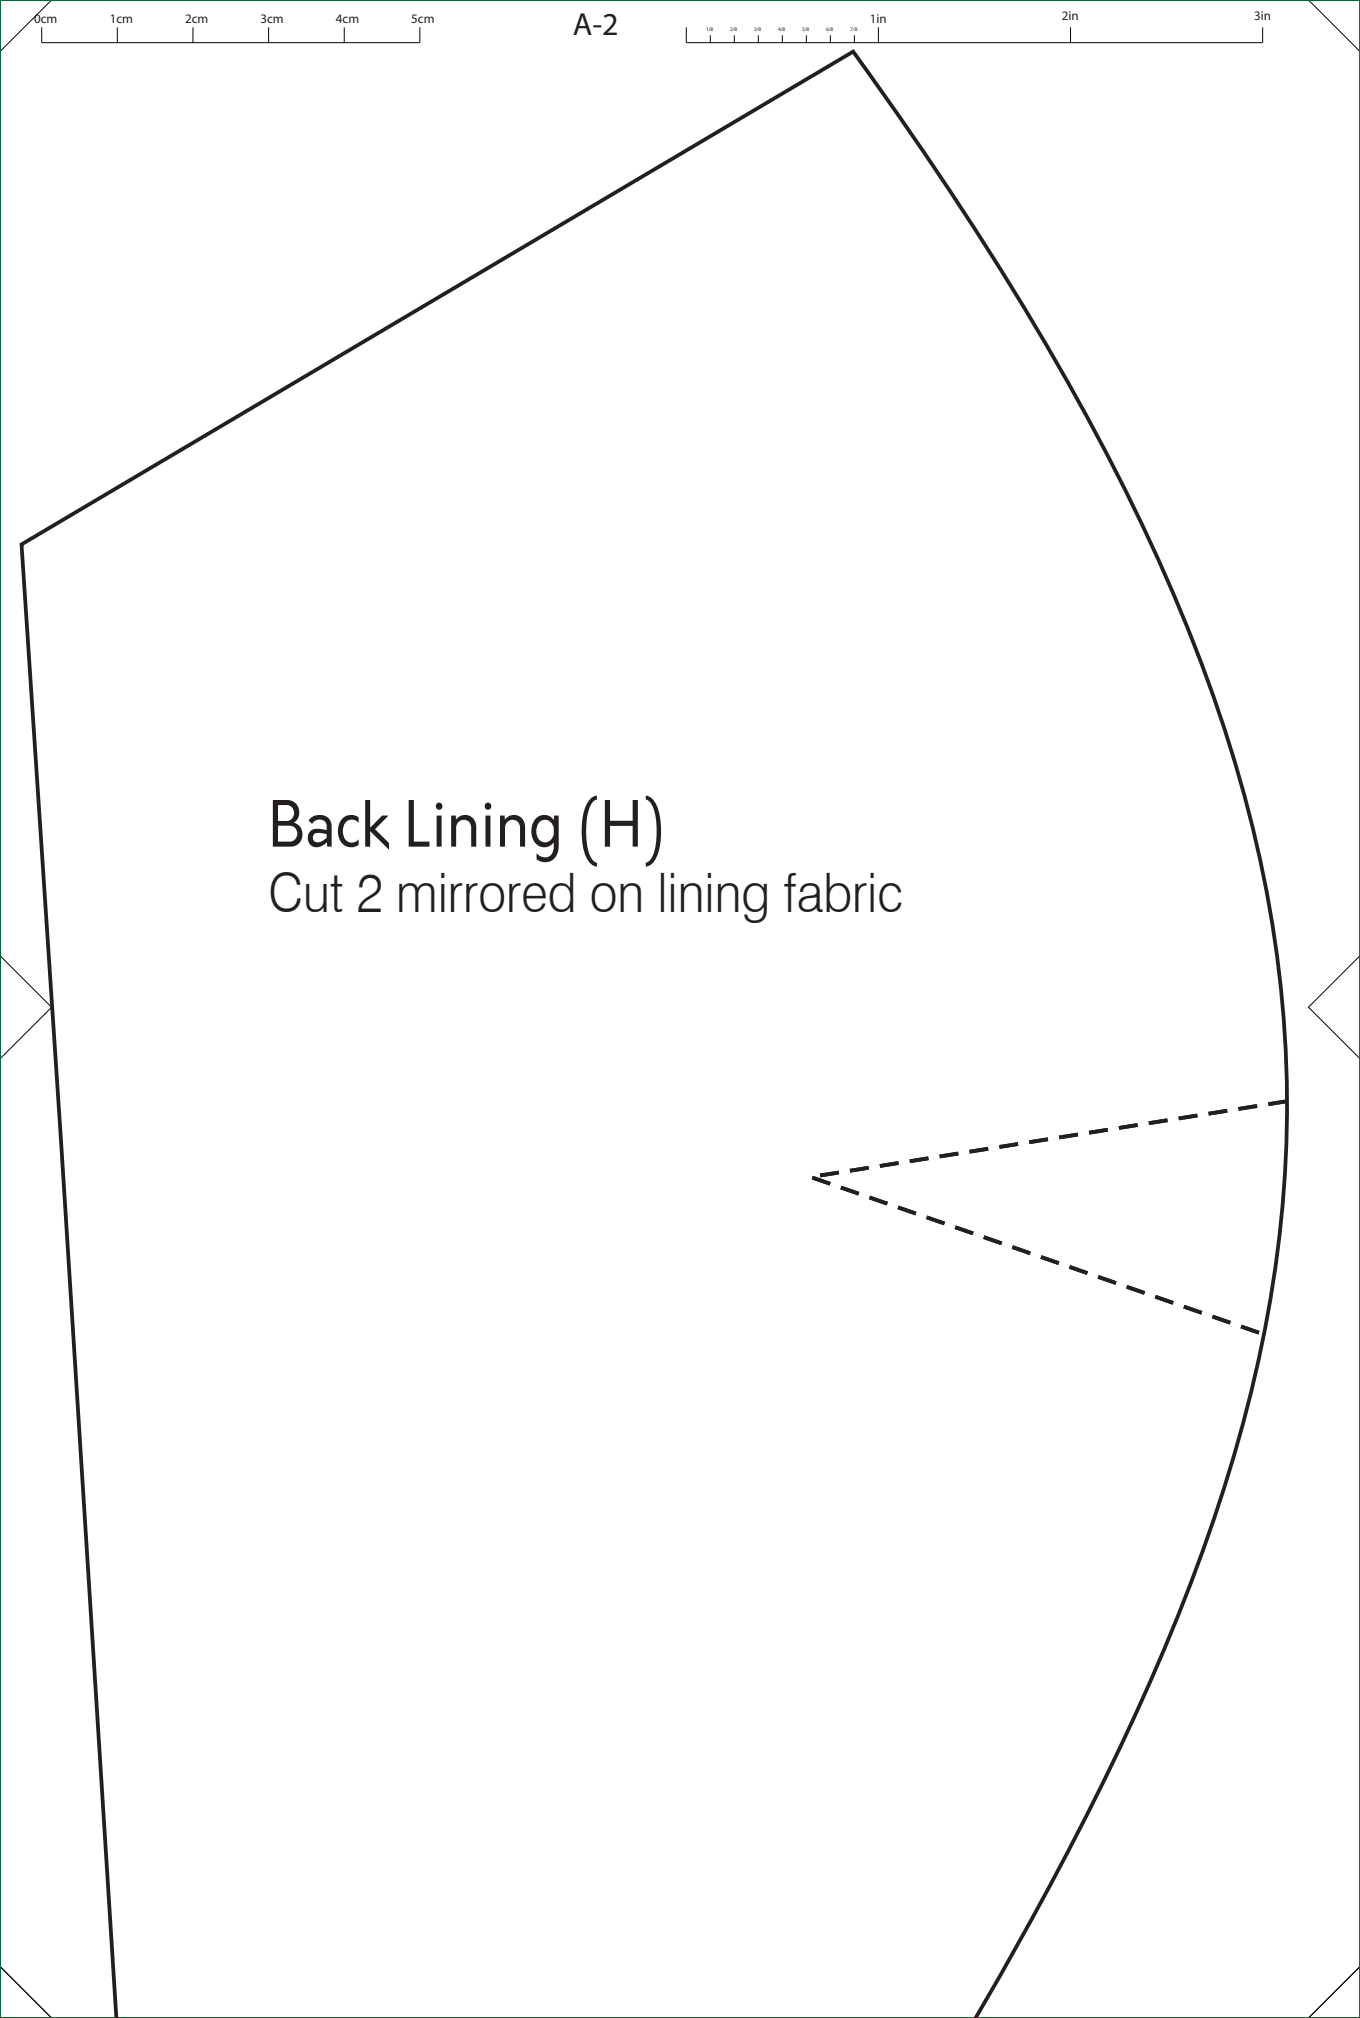

SEWING INSTRUCTIONS

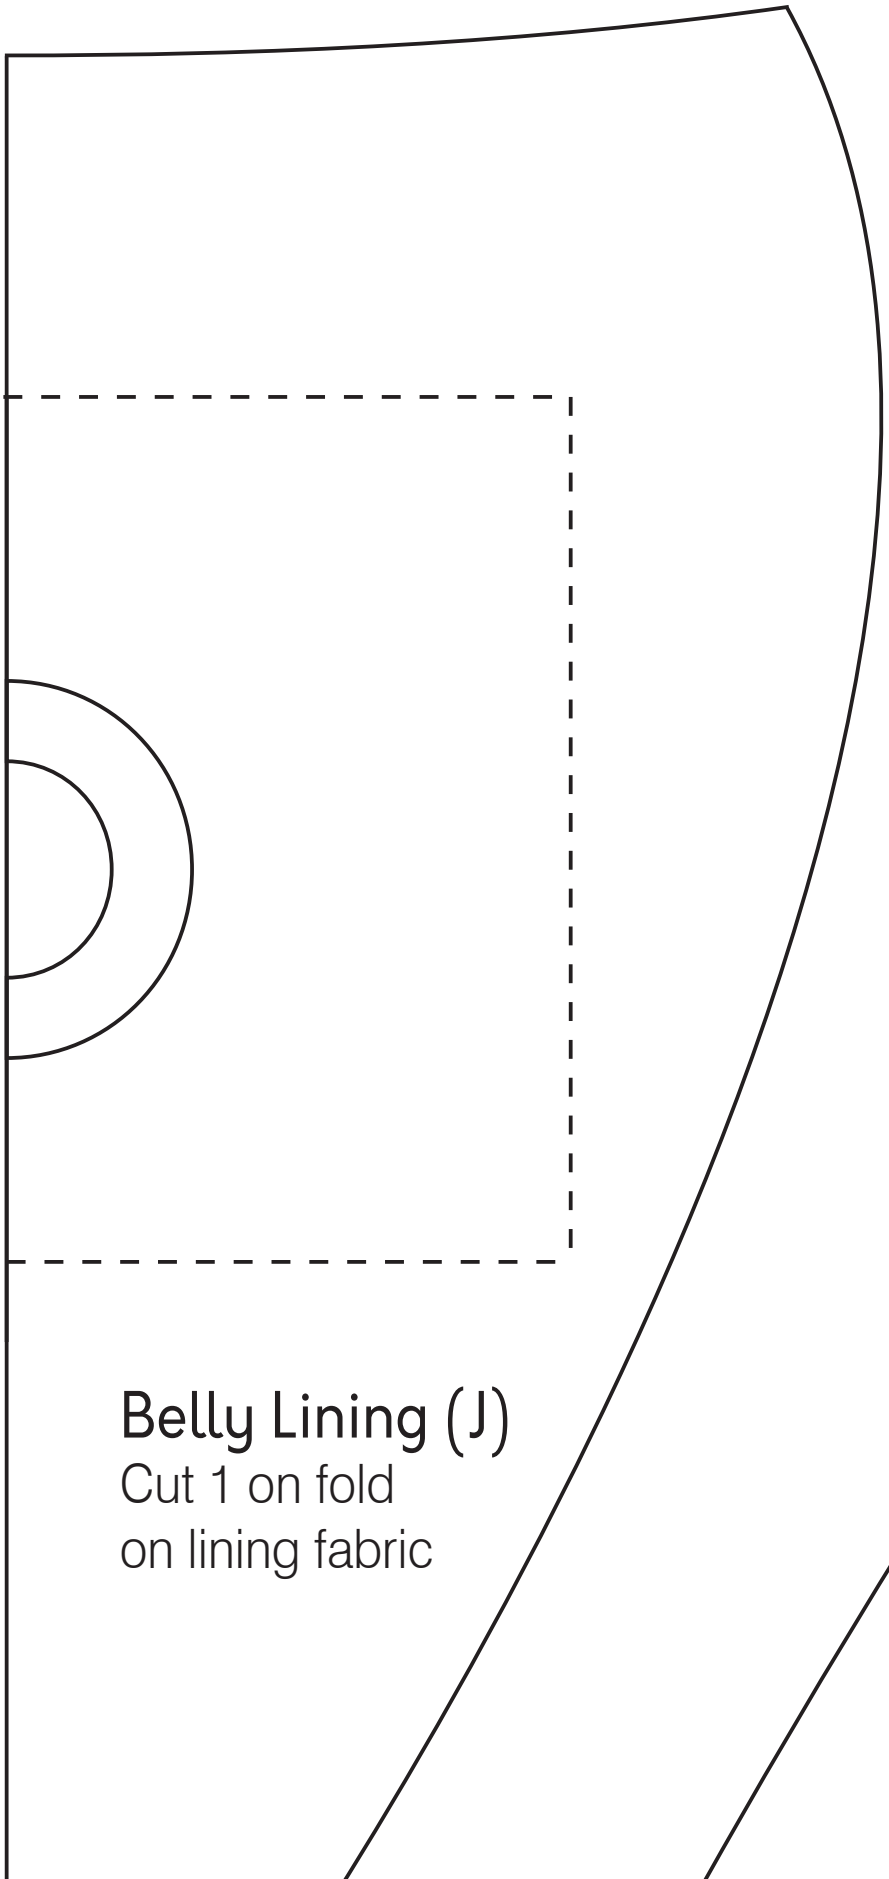

- Seam allowances are included in all the pattern pieces. If printed on 100% scale, the seam allowance is 1cm. If printed on other scales, the seam allowance = 1cm X scale. For instance, if printed on 70% scale, the seam allowance should be 0.7cm.
- Please visit **www.contedefees.co.uk** for step-by-step sewing instructions with HD photos.

Note: Seam allowances are included in all the pattern pieces.
