

Hello :)

My name is Behlül.
Thank you for purchasing the product.
Check the size first. You can use a 1mm punch for the holes. The hole spacing is 5mm. Be careful before cutting. For more precise cuts I recommend a sharp blade and oblique grip. Hope you like crafting. My English is not very good so I use google I hope I translated what I wrote correctly. Let me know if you have any questions, I may be delayed due to the time difference. I need to sell more to stay afloat in this business. I need your stars and comments so that others can buy my products. Polish the edge before assembly. It can be difficult if you want to polish the edge later. I took a video to show how the product is made, it will be easier if you watch it. In the video I show the places to be sewn and the order. I use four times more thread than where it needs to be sewn. If you're just starting out, use a slightly longer rope.
The inner dimensions of the metals I use are 20 mm.
Since a few skins are 23 mm, I thinned the skin from the corners and applied it.
