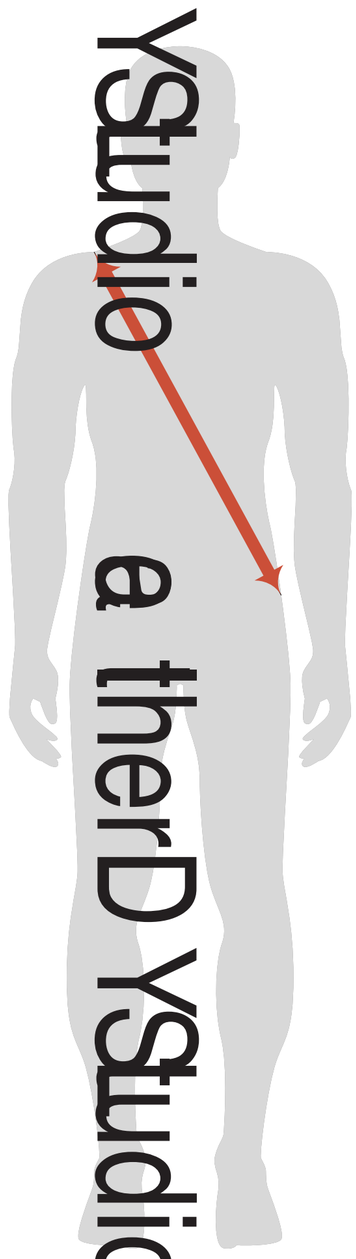
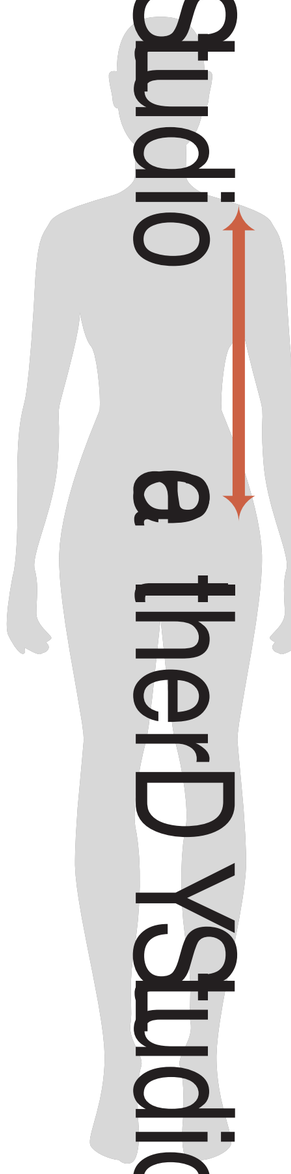
# General Guide - Strap

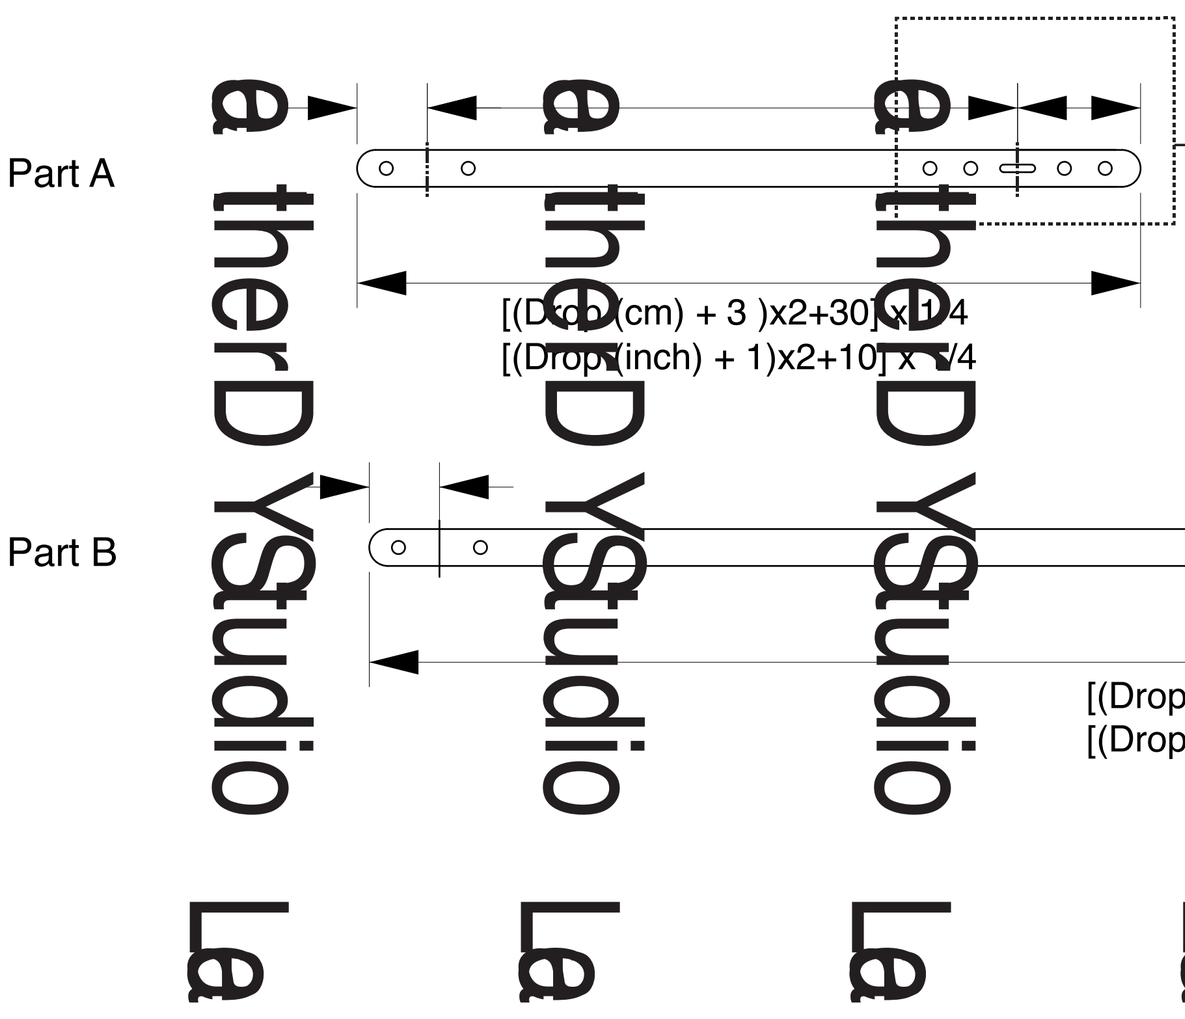
Take body measurements to find out the best drop length
Take a tape measure and measure from the top of your shoulder to the waist where you want the body of the bag to sit. This would be where the top of the body of the bag will start.
Some people prefer their bag to sit lower or higher; please take that into account.



Wear as a crossbody bag



Wear as a regular shoulder bag



Example:

For a 18 Inch Drop

Part A: [(18+1)X2+10]X1/4=12 inch
Part B: [(18+1)X2+10]x3/4= 36 inch
