Annotations and general guidelines

- Print this pattern using the US Letter type format regardless of what type of paper you are using and remember to select the option 'Print on entire page' or 'Fit to page' or 'Disable page margins', based on your printing software. Please mark that this step is mandatory or you won't be printing accurately.

- The parts outlined with a simple line and filled with a gray shade need to be cut out and assembled together after trimming the areas marked with a dashed line and a scissor. Ex:

Outlines the pattern parts

Marks a discardable zone

- The dotted lines represent areas where the leather needs to be folded. Not to be confused with the hollow circles which demarcate rivet holes or stitching holes that are to be punched out. Ex:

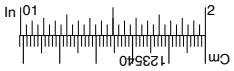

Folding line demarcation

- The puzzle piece that you may encounter is there for making sure you are aligning the right pieces in their proper order:

- The outlined circles need to be punched out and the size of the holes will be left out to your preference depending on what type of accesories or tools you are planning to use (rivets, needles, snap fasteners, stitching punches, hole punches, etc). Ex:

Circles are to be punched out

- The ruler needs to be measured for accuracy and made sure it's not larger nor smaller than your instrument of measure.

- Wavy surfaces need to be dyed in some color and dotted ones show overlapping parts

Surface to be dyed

Marks overlapping areas

- Each part of the project is assigned a number however these parts are represented using aletteraswell.Forexample(1a,1b,1c)makeupthesamepartwhilethelettersarethere onlyto hint at the order of assembly which will always be alphabetical, from left to right.

- Numeral numbers represent the steps you need to take towards completing the project. Ex: (I) means that you should begin with that operation, (IV) marks the fourth step to be followed and so on.

We used 2-6 oz (~ 5 mm) vegetable tanned leather, dyed with Red Riding's dye.
Each 4 pieces represent a set. I included an additional set to save your paper in case you mess to make more two.
The parts are stitched to each other from left to right using cross stitching.
Insert the 24 needed head ball studs before assembling the parts.
The hanger piece (2) needs to be fastened between two studs, in the marked place on part 1. Once placed you need to enclose it inside a keyring.
